What we make

We manufacture replacement blades for ride-on mowers, walk-behind mowers, walk-behind mowers and brush cutters. Almost every model below is cross-referenced to an OEM part number, so you can match it against the machine you are servicing without sending us a sample first.

Mulching Blades	Discharge control and finer clippings; the volume seller in most markets.
High-Lift Blades	Stronger vacuum for bagging and clean-up work.
Brush Cutter & Saw Blades	Heavy vegetation, clearing and forestry work.
Custom OEM / ODM Parts	Made to your drawing, sample or part number.

Where they are used

Residential lawn care · golf courses and sports turf · commercial landscaping contractors · agriculture and forestry. We supply distributors, importers, OEM brands and service networks — we are a business-to-business manufacturer and do not sell to consumers.

Model range by OEM number

59 models in production. Every one is made in 40Mn manganese steel and batch hardness tested. Send a part number and we will confirm fitment. **Multi-fit** rows are kits covering several machines — match them on the brand or machine list shown.

OEM part no.	Type	Deck	Centre hole	Fits (brands)
038-0005-00	High-lift	54"	Round	Bad Boy
038-2007-00	High-lift	60"	Round	Gravely, Exmark, Toro, Hustler, Bad Boy

Multi-fit	—	52"–54"	Round	Ariens, Gravely

Manufacturing capability

Blanking, forming, heat treatment, grinding and inspection all happen on one site. That is what makes a hardness figure stick: we control the heat treatment, not a subcontractor.

Material	40Mn manganese steel
Hardness	45–50 HRC, held through the part
Minimum order	300 pcs (mixed models allowed)
Capacity	50,000 pcs/day
Plant	25,000 m2, 800+ staff, founded 2008
Shipping ports	Shanghai · Guangzhou · Shenzhen · Ningbo · Xiamen
HS code	820840000

Inspection before packing

Batch hardness testing · dimensional checks against the drawing · decarburisation depth held at or below 0.1 mm · packing checked against the agreed carton and pallet specification.

Heat treatment in-house

Hardness and dimensional checks

From enquiry to shipment

1. Enquiry	Send a part number, drawing or photo, plus quantity and destination.
2. Quotation	Price, lead time, Incoterms and packing confirmed in writing within 48 hours.
3. Sample	Pre-production sample for fitment and hardness sign-off where required.
4. Production	Blanking, forming, heat treatment and grinding in-house.
5. Inspection	Batch hardness testing, dimensional checks and decarburisation control before packing.
6. Shipment	Cartons and pallets to your forwarder or ours; documents issued for customs.

Send a drawing, sample or part number

If a model is not listed, send what you have — an OEM number, a photo with a ruler in frame, or a drawing. We will come back with fitment, price and lead time. Quotes are issued per enquiry; prices are not published.
